# Roller Levels

RL66 | RL84

## Specifications

- Worksite Pro™ Roller Levels deliver reliable, cost-efficient productivity for finish-grade work.
- Designed for minimal maintenance and maximum uptime, with only two greasable bearings, two replaceable cutting edges, and no hydraulics
- Roller pulverizes clumps and clods for a smoother finish in loose soil.
- Front roller position offers unobstructed visibility and provides total control when contouring, grading, cutting, and smoothing flat or significantly sloped terrain.
- Front and rear cutting edges make quick work of tough site-prep and grading tasks. Use either or both edges to spread loose material and for quickly cutting or scraping hard-pack without disturbing the base below.
- Like all Worksite Pro™ attachments, these roller levels are optimized to work with John Deere E-Series Skid Steers and Compact Track Loaders (CTLs). They're also compatible with many competitive models. See your local Deere dealer for details.
